

Notes for “Infections & Infestations” Videos

- These are 3 very brief videos describing infections with each germ (Bed bugs, C. difficile, Scabies) and associated prevention measures
- Videos should be presented as a cluster since they are all very short.
- Each video has a one question quiz at the end. Pause the video before the answers are given to ensure that staff have the opportunity to think through the answer on their own
- Dialogue with the community and ensure they have policies around these topics. Further resources are below.

Bed Bugs:
